Outline:

1. Introduction

2. Sign up/Log in

3. User profile

4. Main page

5. How to insert a new book

6. Chat

7. How to look for a book and ask for it
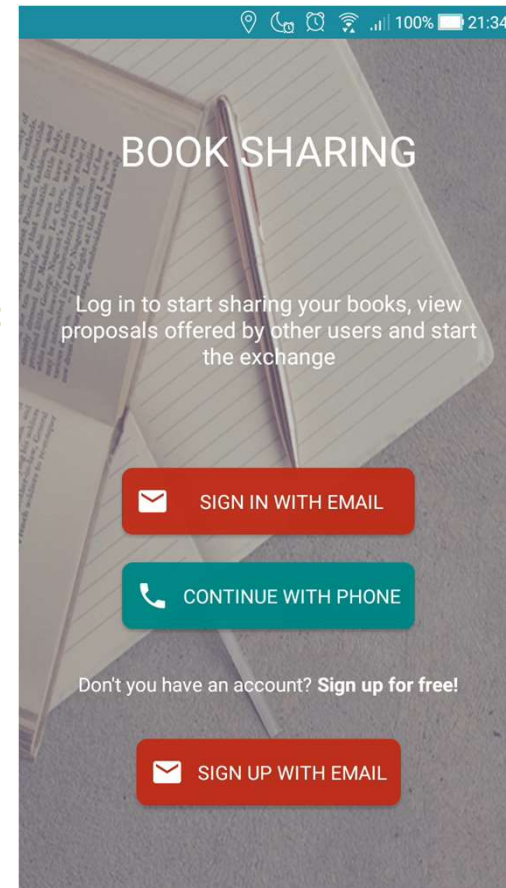

8. How to rate another user

1. Introduction

- BookSharing is an app designed for book lending

- Students and reading lovers are the ideal users

- The app is based on the thrust that each user places in the others. In fact, every time a load takes place, at the end both users have the opportunity to review the other and all users have the possibility to see the feedbacks released by the other ones.

2. Sign up/Log in

- Two ways of registration are available on BookSharing:

1) E-mail & Password

2) Phone number

4

3. User profile

- The first time a user sign up, he/she has to compile profile information

- Some fields are mandatory

- The user can choose the profile picture from the gallery or take a selfie

4. Main page

- All books
- Slide menù:
  - Home
  - My profile
  - My books
  - My requests
 - Inbox
  - Search
  - My points
  - Log out

5. How to insert a book

- The user has two options:
  1) compile manually at least the mandatory fields and add photos of the book by shooting them with the camera or choosing them from the gallery
  2) scan the isbn code of the book
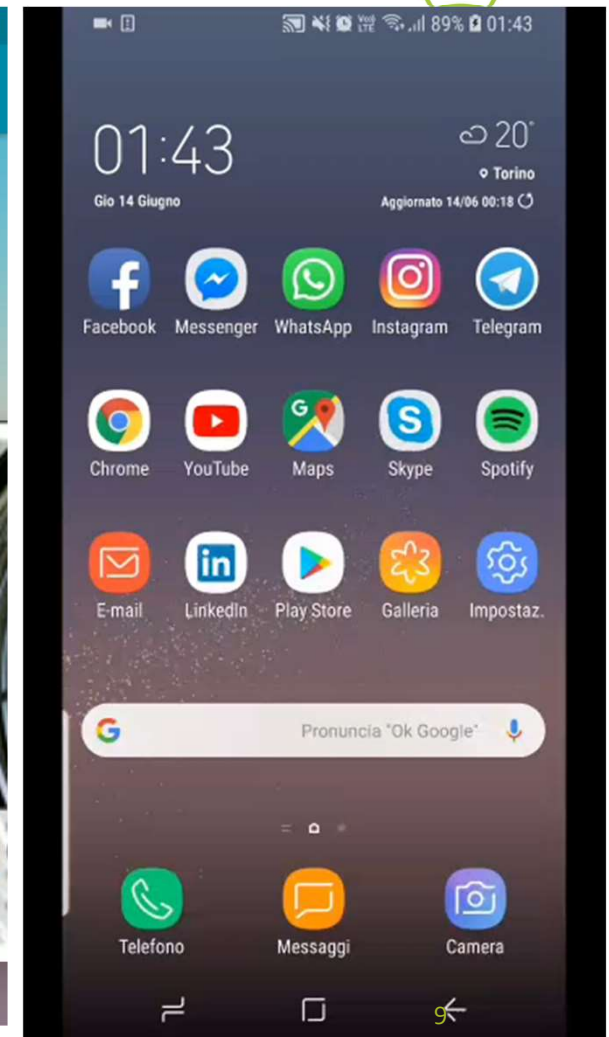

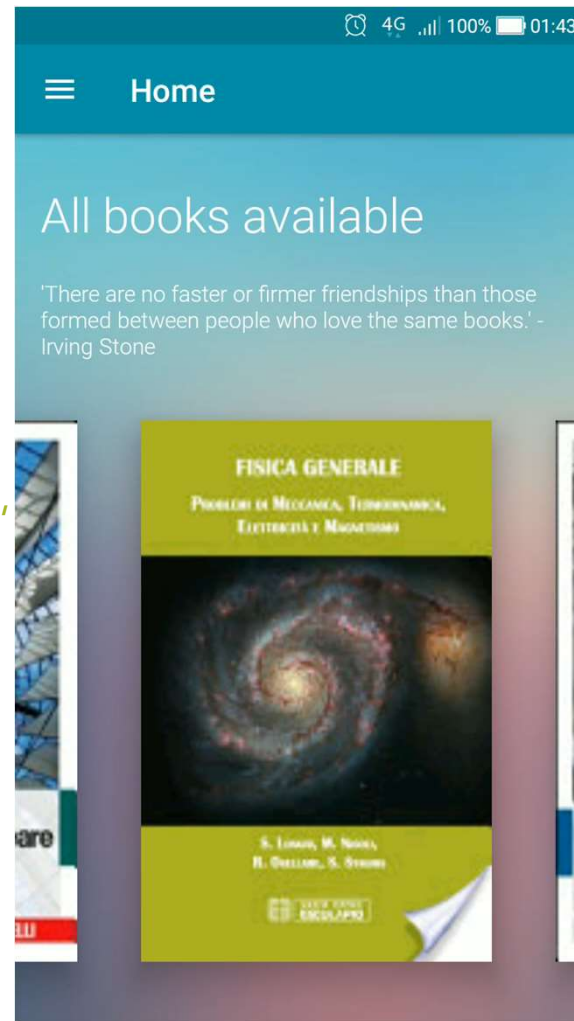

- The user can modify the book information at anytime

6. Chat

- Sending Message
- Two way to see it
  - By clicking on notification
  - Checking the Inbox

- Show red bullet in inbox for unread messages

7. How to look for a book and ask for it

- Tap search from the main page menu

- The user can search for a book by:
  - ➢ Title, author, genre,...
  - ➢ Or if he/she leaves all fields empty, all books
  present in the network will be displayed on the map

- Tap an icon on the map to see book's owner information,

send a request to him/her and start the chat

- The owner can accept or decline the request and

whatever choice is made, it is notified to the sender

- Through the chat, users can agree on the date

- The status of the book is traced

8. How to rate another user

- It is possible to rate a user only at the end

- The book owner can evaluate the other user

- The borrower can evaluate both the owner and the book

- The rating is composed by:

  ➢ A number of stars from 1 to 5

  ➢ An optional comment

Thank you
